Professional Summary

Passionate and detail-oriented Front-End Developer with a degree in Computers and Information from Zagazig University (Class of 2025). Skilled in building responsive, high-performance, and user-friendly web applications using modern technologies including JavaScript, TypeScript, React, Next.js, and Tailwind CSS. Adept at implementing state management, integrating RESTful APIs, and deploying scalable projects.

Education

Bachelor's Degree in Computers and Information at Zagazig University, Al-Sharqia, Egypt **2021 - 2025**

Faculty of Computers and Information - Major in Computer Science

Skills

Frontend Development: HTML5 , CSS 3 , JavaScript (ES6+) , React.js , Redux ToolKit , Tailwind CSS , Next.js (App Router) , TypeScript , React Three Fiber , Three.js , Material-UI

State & Data Management: RESTful APIs , Axios , Context API , Redux Toolkit , LocalStorage

Tools & Hosting: Git & GitHub , Vite , npm , VS Code , Vercel

Projects

NOVA Store - E-commerce Platform • Live Demo

• Developed a modern and fast e-commerce web application built with Next.js (AppRouter), JavaScript, and Tailwind CSS.

• Integrated RESTful APIs using Axios to fetch and display dynamic product data smoothly.

• Designed an interactive UI featuring an engaging Hero section powered by Swiper.js to highlight featured products and offers.

• Built clean, fully responsive product listings and optimized routing for an enhanced shopping experience.

Gusto - Restaurant • Live Demo

• Developed a modern restaurant web application featuring an interactive 3D table reservation system built with Three.js and React Three Fiber (R3F).

• Implemented immersive 3D spatial viewports (Dining Room & Outdoor Terrace) allowing users to interactively select, inspect, and book real-time available tables.

• Designed smooth camera controls (drag-to-explore, zoom) and real-time visual feedback for table status (Available, Selected, Unavailable).

• Built responsive, elegant sections for dynamic food menus, staff showcases, and brand storytelling using React.js and Tailwind CSS.

Weather Application • Live Demo

• Built a real-time interactive weather application using React.js and Tailwind CSS.

• Integrated OpenWeather REST API using Axios to retrieve current weather metrics and multi-day forecasts.

• Implemented dynamic video and background UI shifts tailored to real-time weather conditions.

• Optimized state management to render smooth location updates and weather data visualization.

Task Management App (ToDo List) • Live Demo

• Created a feature-rich task management app with full CRUD operations and task filtering capabilities using React.js.

• Utilized Browser LocalStorage API to persist user tasks and state across page reloads.

• Integrated SweetAlert2 and react-hot-toast to deliver custom interactive notifications and sleek user feedback.

• Designed a clean, fully responsive user interface using Tailwind CSS.
